

# Iron Falcon

By: Gabriella Janka

## Basic Facts

- 13 protons
- 13 neutrons
- 13 electrons
- 3 electron shells
- Atomic number is 13

## Characteristics

- Aluminum is a metal
- Aluminum is the most abundant metal in the Earth's crust
- Aluminum is a compound

## History

Hans Christian Oersted, a Danish chemist was the first to produce tiny amounts of Aluminum.

## Important use

- Aluminum can be used to make soda cans.
- Aluminum could be turned into foil.
- Aluminum is used as kitchen utensil.

## Watch Out

The Iron Falcon is a villain , that is a girl. She is a shape shifter, she can turn into any kitchen utensil. The Iron Falcon can suffocate you in her deadly tin foil. She can stab you in the back with her hand. The Iron Falcon also has **super strength**. Her best friend in crime is The **Heliometer**. Her worst enemy is **Silvie** the shining knight. She is the most **EVIL** of them all.
