Where would you like to live, when you get older? I would like to live in a suburban. I like that it is like a mix of both. Not like a rural with space and room, but not close like a urban. I like the grass and the trees I feel when I touch them. The friends and family I see as I'm walking. The birds chirping I hear as I wake up. The taste I taste of things I bought from the store. I smell the sweet flowers in my garden . Maybe I'll live in a suburban someday.
